Loving this game, I have loads of time playing the beta and I still I know so little about the complex strategies, the skill ceiling is quite high - as every unit is unique - however you only need to do the tutorial to learn the few fundamental rules to really get going and enjoy the game.. Tutorial lvl 3/3 game crashes -no KI only PvP -noone plays the game, so no games played. -you don't know your own units. BC you can't play. I invested 1 - way too much.. If you like turn based strategy I don't think you can go wrong picking this up. I'm having fun so far but the vast unit selection is going to take me some time to crunch through; so I can't fairly give any opinions yet other than that I've had fun with it and probably will continue to do so for many hours.. Right now the game has a couple issues, (pretty much just performance rn and that's meant to be fixed real soon) but hot damn I love this game. It's definitely a nerd game (ya know numbers and shnit), but if want a really competitive, challenging, stylish game with a lot of variety and really active and chill discord I couldn't recommend it more.. This game is a great new take on the XCOM style of gameplay. It has a decent variety of units and a few interesting maps. The developers are extremely friendly and active in their discord channel, and with continued support I can see this game staying enjoyable for a long time as it has a great amount of depth. And for 20 dollars, its a great price.. Overall, I wouldn't buy this game for the current price at the current time point. Pick it up later if the game is more developed, and if it's on sale. In principle, it's a fun idea: Atlas Reactor, just copied for 1v1 instead of 5v5. Graphics and the feel of the game are quite similar to Atlas Reactor, although everything is either a bit lower quality (the graphics, the sounds, the characters), or a ton lower quality (customization). In addition, Atlas Reactor is for free, and not pay to win (all characters and abilities available from the start). In parts, the game has stolen well: there are three "races" you can play, which feel like human (weapons, mechs), protoss (technical, tech-enhancements), and zerg (bio, bio-enhancements). It's a fun mechanic, and works well. There are 3 tiers of units (heroes, strong units, weak units), which adds quite a bit of strategy to the game. Some units are really well made, and there are some pretty unique features and abilities in the game. This is the most positive aspect of it. Unfortunately, the game freezes regularly, there are nearly no opponents to play against, the tutorial is only 2 minutes, there is no proper mode where you play against bots (only a sandbox mode, but that takes ages to set up and is not the same). There are nearly no customizations (cool skins, items, achievements, fun stuff like in Atlas Reactor or Overwatch or other games). I regret buying the full game, because it has a pretty strong beta feel to it.

Release date 21 feb 2019 announced! : Hi Everyone! We are super excited to announce the release date for BATALJ; 21st of February! We would be really happy if you added BATALJ to your wishlist! /Fall Damage team. The BATALJ Closed Beta is a-go! : Hi all! While the full BATALJ game is not yet ready for release, there is a Closed Beta active. We appreciate all opinions and feedback you provide. A lot of things have already been highlighted by players, ranging from support for less common hardware, to places where the game UI can be improved, as well as individual unit balance. If you are interested in participating, here are several ways that you can get hold of keys for the Beta: Sign up for the newsletter at and wait a while Get the Yogscast Jingle Jam bundle, it includes two Beta keys Check out the Share Beta Keys sub-forum here, perhaps another player has a key to spare? You can get in touch with the developers via these forums, Discord [www.playbatalj.com] and Reddit [www.playbatalj.com] .
